

RAVASOL GAC P0.8

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

DESCRIPTION

RAVASOL GAC P0.8, virgin extruded activated carbon produced through a high temperature activation process.

RAVASOL GAC P0.8 can be used in many vapor and water phase applications with a low-pressure flow during use. It is very effective for removal of organic compounds, deodorization, VOC's, siloxanes, etc.

SPECIFICATIONS

Parameter	Value
Iodine index	> 1000 mg/g
Methylene blue index	> 200 mg/g
Moisture (as packed)	< 5 %
Particle size (diameter 0.80-0.95mm)	90 %
Hardness number (ball-pan)	> 95 %
Ash content	< 7 %
Apparent Density	400 ± 50 kg/m ³
pH	8-11
