Introducing

Phoenix Vessel Technology Ltd started business in 1984 and has pioneered high quality bespoke composite pressure vessels for the water treatment industry.

We are an experienced and highly skilled specialist UK manufacturing company supplying customers world-wide.

As part of the Ravago Chemicals Group we have the family backing of a multi-national global organisation.

Technical Expertise

Our highly skilled engineering design team have the technical expertise in material technology & production techniques to provide you with best solution for your pressure vessels.

Product Range

2.5" end port to 11" side port vessels.

8" & 9.4" FEP Lined end port vessels for corrosive applications.

Up to 120bar / 1740psi.

PED or ASME X (code stamped if required)
