

RAVASOL GAC P4 KOH

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

DESCRIPTION

RAVASOL GAC P4 KOH, virgin extruded activated carbon produced through a high temperature activation process and chemically impregnated with KOH.

RAVASOL GAC P4 KOH can be used in many vapor phase applications with a low pressure drop during use. It's very effective for removal of H₂S, mercaptants, HCl.

SPECIFICATIONS

| Parameter | Value |
|-------------------------------------|----------------------------|
| Iodine index | > 750 mg/g |
| Carbon Tetrachloride Activity (CTC) | > 50 % |
| Moisture (as packed) | < 5 % |
| Nominal Diameter | 4 mm |
| Hardness number (ball-pan) | > 90 % |
| Ash content | < 12 % |
| Apparent Density | 570 ± 30 kg/m ³ |
| KOH | > 6 % |
