

RAVASOL PAC Colour E-153

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

DESCRIPTION

RAVASOL PAC Colour E-153 is a powdered activated carbon, produced from prime quality and solely vegetal origin, especially suitable for colouring foodstuff like: bread, pasta, ice cream, salt, liquorice, but also finds use as colour additive in other products like soaps & cosmetics.

RAVASOL PAC Colour E-153 has a high colouring power, high purity and an ultrafine particle size and is in compliance with the European Regulation 231/2012 (March 22, 2012), the U.S. Food Chemical Codex (9th edition 2014) and the Pharmacopeia 8.0. guidelines.

SPECIFICATIONS

Parameter	Value
Carbon content	95%
Ash content	<4%
Moisture	<10%
Iodine Index	>1000 mg/g
pH (water extract)	Neutral
Particle size distribution:	
D 10	<2 µm
D 50	<6.5 µm
D 90	<15 µm
